UTKU HACILAR

ICT Teacher • Educational Technology • Artificial Intelligence • Project & IT Management

Nilüfer, Bursa, Türkiye | +90 534 319 12 19 | utkuhacilar@gmail.com | linkedin.com/in/utku-hacilar-a470bb202 | github.com/utkuhacilar

ABOUT ME

I teach Information and Communication Technologies and manage my school's IT infrastructure, educational technology and AI applications together. I plan and deliver technology-focused education projects. I have hands-on experience in student development, teacher training, project management and technology integration. I focus on integrating AI tools into teaching and learning to increase the productivity of teachers and students.

CAREER COMPETENCIES

- Educational Technology & AI Integration
- ICT Teaching & Student Mentoring
- School IT Operations, Conference Hall & Lab Setup
- Project Management • TEKNOFEST / National Robotics Competitions
- AI Club & Student Project Development
- Teacher Training & In-House Technology Adoption

  Technical Tools: Python, HTML, CSS, JavaScript, C#, PHP, React, Node.js, PostgreSQL, Arduino, Tinkercad, Figma, Canva

  AI Tools: Claude, Claude Code, ChatGPT, Gemini, OpenAI API, NotebookLM, MagicSchool AI, InVideo AI, VEO AI, Runway

PROFESSIONAL EXPERIENCE

ICT Teacher | Özel Mesafe College | May 2021 – Present

- Planning and teaching ICT courses and running student projects.
- Managing the school's day-to-day IT operations; solving computer, internet, user and classroom technology issues.
- Setting up, maintaining and repairing the conference hall, smart boards and computer labs.
- Taking responsibility for the school's technology processes: deploying and removing applications, resolving internet infrastructure problems and managing communication with vendors.
- Providing regular mentoring to students on academic, social and school life.
- Planning the AI Club and managing students' chatbot and project development.
- Delivering hands-on training for teachers on AI in education; adapting tools such as MagicSchool AI, Claude, ChatGPT and Gemini to teaching processes.
- Guiding student teams in projects and competitions such as TEKNOFEST and national (MEB) robotics competitions; 2nd place in Türkiye at the TEKNOFEST 2026 Unmanned Underwater Systems Competition.
- Creating hands-on learning environments around Python, Arduino, robotics and coding, web development and educational technology.

Junior Developer | Medya X, Bursa | January 2018 – January 2019

- Developed PHP web applications and database integrations; took an active role across the full web development cycle.

Junior Developer | Türkticaret.net, Bursa | January 2013 – January 2014

- Developed applications with the .NET Framework; learned core software development principles and corporate workflows.

SELECTED PROJECTS & ACHIEVEMENTS

- **TEKNOFEST 2026 Unmanned Underwater Systems Competition – 2nd Place in Türkiye:** Led the design and development process of the student underwater vehicle team as advisor teacher.
- EduKilit: Smart-board lock and management system for schools; central admin panel, remote lock, file push and parent SMS notifications (Electron, Node.js, PostgreSQL, React).

- School Assistant: AI chatbot and voice assistant for the school, built on the OpenAI API.
- AI Club: Chatbot development with students, from problem definition and content creation to project planning.
- Smart Periodic Table: Interactive teaching aid built with RGB LEDs and electronic components.
- Robotics & Coding: Arduino-based sensor, LED, buzzer and automation projects.
- School Technology Operations: Sustainable use of computer labs and management of technical needs.
- AI in Education: Introducing generative AI tools to teachers through classroom applications.
- E-commerce: Setting up and designing online stores for businesses (ikas).
- MEB Robotics Competition (July 2023) – Advisor teacher providing technical guidance to the student team.
- TEKNOFEST Competition (2021) – Advisor teacher managing the project development process.
- Destination Imagination (January 2022) – Advisor teacher for a creative problem-solving team.
- Trakya University Promotional Catalogue (January 2018) – Web developer and designer of the institutional catalogue.
- UAV & Underwater Vehicles (ROV): Designing and developing drones and underwater exploration vehicles with students; preparing a TEKNOFEST 2027 UAV team.

EDUCATION

Anadolu University — Management Information Systems | June 2020 – Ongoing

Trakya University — B.Ed. Computer Education and Instructional Technology | May 2019 – May 2021

Celal Bayar University — Associate Degree, Computer Programming | June 2016 – June 2018

TECHNICAL SKILLS

Programming: Python, C#, PHP, ABAP, HTML, CSS, JavaScript, .NET, React, Next.js, Node.js

Databases & Tools: PostgreSQL, Prisma, Electron, Socket.io, Git, GitHub

Electronics & Robotics: Arduino, ESP32, sensors, Tinkercad, 3D printing, LEGO Mindstorms EV3/Spike Prime, mBlock/Scratch, electronic prototyping

AI & Productivity: Claude, Claude Code, ChatGPT, Gemini, OpenAI API, NotebookLM, MagicSchool AI, InVideo AI, VEO AI, Runway

Design & Production: Figma, Canva, Adobe Photoshop/Illustrator, AI-assisted video and visual content production

Systems & Network: Network administration, Windows setup and maintenance, server setup, hardware maintenance and repair, smart board management, conference hall audio-visual systems

Office & Support: Microsoft Office, Help Desk / Technical Support, ikas e-commerce platform

TEACHING AREAS

Fundamentals of ICT • Programming Fundamentals (Python) • Object-Oriented Programming (C#) • Web Application Development • Mobile Applications • Robotics & Coding • Graphics & Animation • Office Applications • Professional Development • AI Literacy

PERSONAL BRAND

Education + Technology + Artificial Intelligence + Project Management

ADDITIONAL INFORMATION

- Languages: Turkish (Native), English (Basic)
- Interests: Software & Coding, Mountaineering, Hiking, Camping, Fishing, Hunting
- References: Available upon request.
